About Bullfrog Gold Corp.

Bullfrog Gold Corp. is a Delaware corporation that currently controls the commanding land and resource positions in the Bullfrog Mine area where Barrick produced 2.3 million ounces of gold by mining and conventional milling beginning in 1989 and ending in 1999 when ore reserves were depleted. Measured and indicated 43-101 compliant resources were estimated in mid-2017 by Tetra Tech Inc. at 525,000 ounces of gold, averaging 1.02 gold g/t in base case plans of the MS and Bullfrog pits. Most of these resources are in the north extension to the Bullfrog pit. Inferred resources were estimated at 110,000

ounces of gold averaging 1.2 g/t, of which most were in the Mystery Hill area adjacent to the Bullfrog pit and where 17 additional holes were recently drilled.

It is noted that the 3-year trailing average gold price is now \$200 higher than the \$1,200 average price used in 2017. The resource estimates were also based on a heap leach gold recovery of 72% compared to the average 85% leach test recoveries recently achieved on four bulk samples.
